- Acer ComfyView™ Display
- -5 to 25 degree tilted angle for the comfortable viewing

1ms Visual Response Boost™

1ms Visual Response Boost™ (VRB), works by either quickly turning off the backlight or inserting a blank, black image between frames aka "blinking". This results in less noticeable blur in fast moving images because the liquid crystals don't have to double up on frames as they rise and fall.

In-Plane Switching technology

In-Plane Switching technology, which is accurate across 178° presents a splendid quality in wide angles. Rough the screen, everything is crisp and clear from any angle.

BlueLightShield™

BlueLightShield technology

Acer Ultra-Low Blue Light technology reduces the amount of harmful blue light emitted by LED panel. You can access and select four different filter settings onscreen easily through the OSD menu to find the best one that suits the task at hand.

Adaptive Sync

AdaptiveSync

Get a seamless, tear-free gaming experience and smooth, responsive visuals with this AdaptiveSync monitor.
