Super Cool

SuperCool

You want your fridge to maintain the optimum temperature, even if you have just put shopping in from the market which has been warmed by the sun? This is a case for SuperCool. Once activated, your Liebherr boosts its performance until the fresh food is as cool as the rest of the contents. SuperCool then switches off automatically.

LED

LED light inside

The LED side lighting illuminates the interior from the side – providing a good overview of your food. Another highlight: the LEDs are positioned in front of the glass shelves so that even a full refrigerator is well lit.

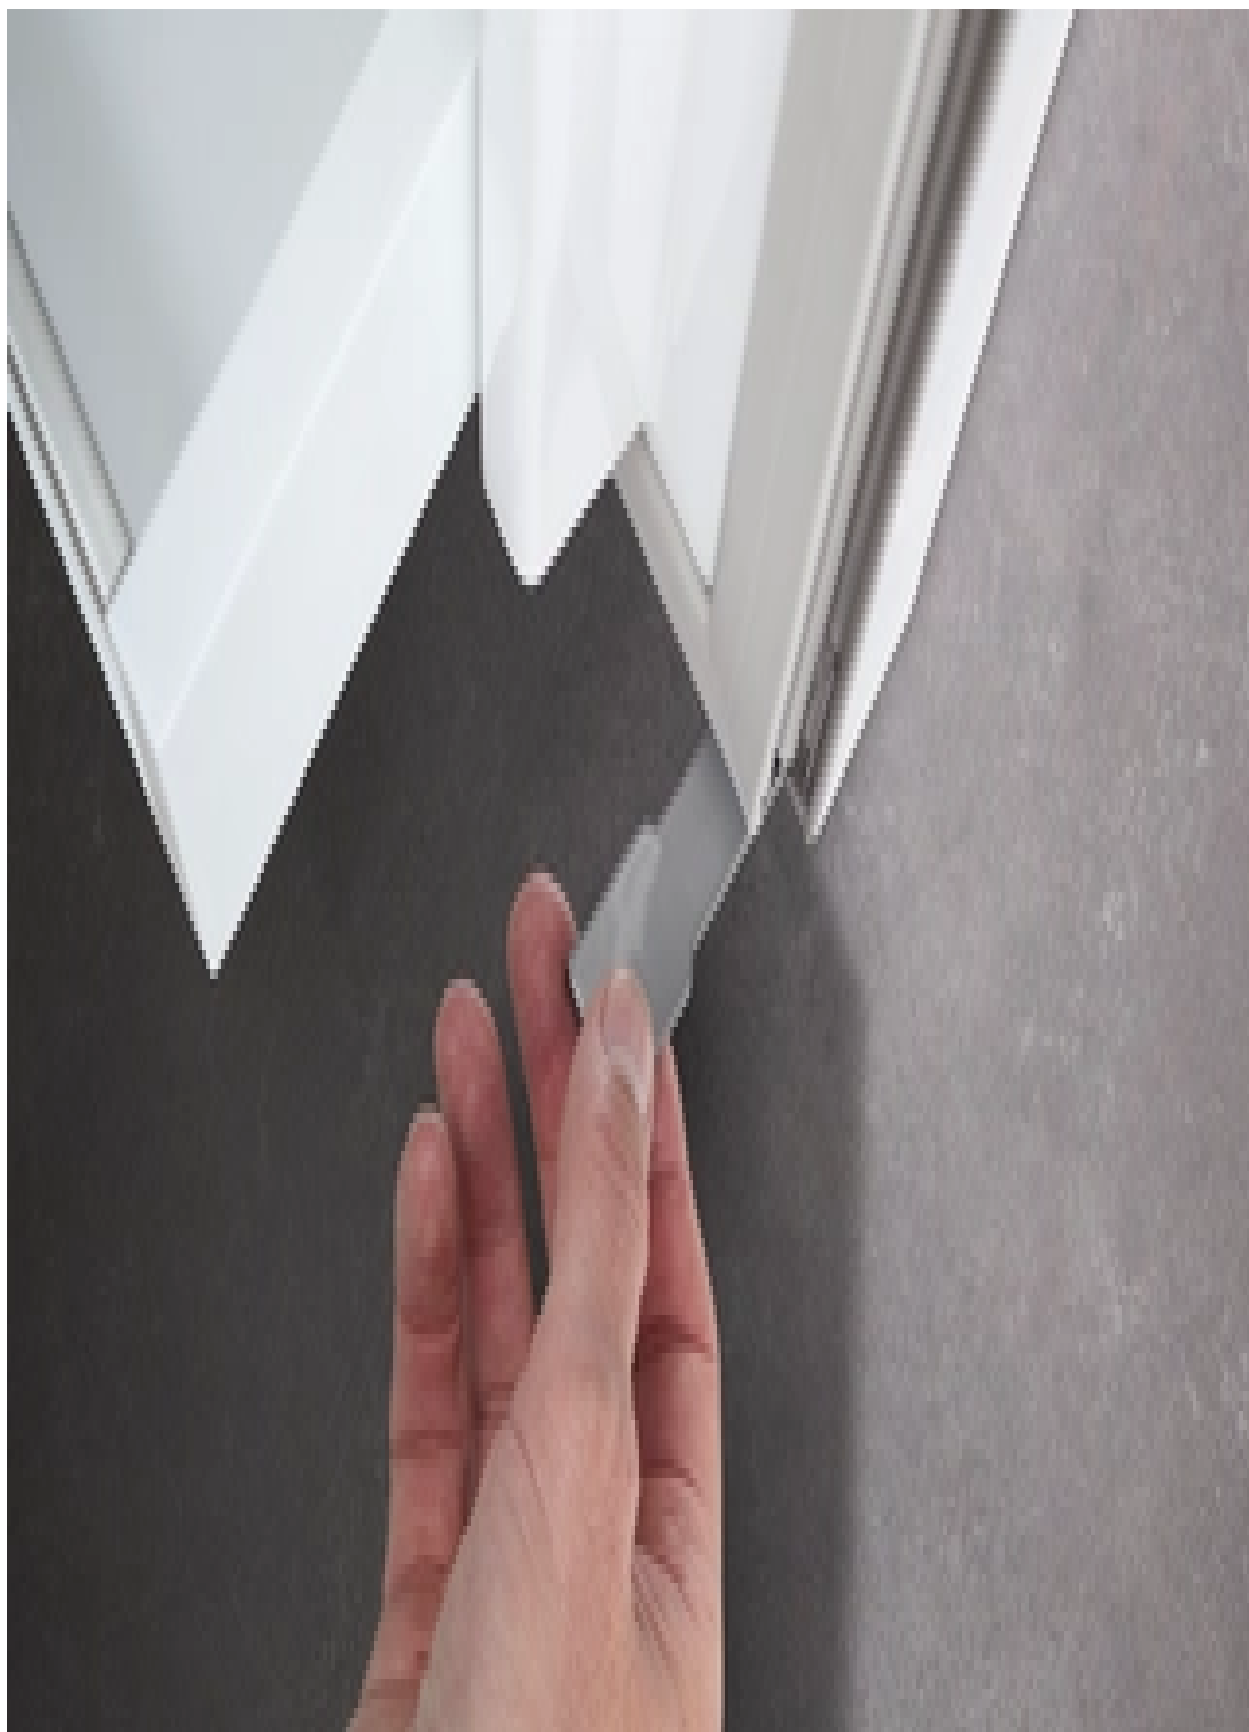

Touch Control

TouchControl

A gentle finger tap and you set your Liebherr to 3, 5, 7 or 9° with TouchControl. So simple – and efficient, as the sleek button is integrated into the interior, creating more space for all your fresh goods.

**Door
Stop**

DoorStop

Keep your Liebherr fresh and odour-free with our retractable DoorStop. Prevents odors by keeping the door open when not in use. Save time and energy.

Features

SuperCool

You want your fridge to maintain the optimum temperature, even if you have just put shopping in from the market which has been warmed by the sun? This is a case for SuperCool. Once activated, your Liebherr boosts its performance until the fresh food is as cool as the rest of the contents. SuperCool then switches off automatically.

LED light inside

The LED side lighting illuminates the interior from the side – providing a good overview of your food. Another highlight: the LEDs are positioned in front of the glass shelves so that even a full refrigerator is well lit.

TouchControl

A gentle finger tap and you set your Liebherr to 3, 5, 7 or 9° with TouchControl. So simple – and efficient, as the sleek button is integrated into the interior, creating more space for all your fresh goods.

DoorStop

Keep your Liebherr fresh and odour-free with our retractable DoorStop. Prevents odors by keeping the door open when not in use. Save time and energy.

Slimline handle with integrated opening mechanism

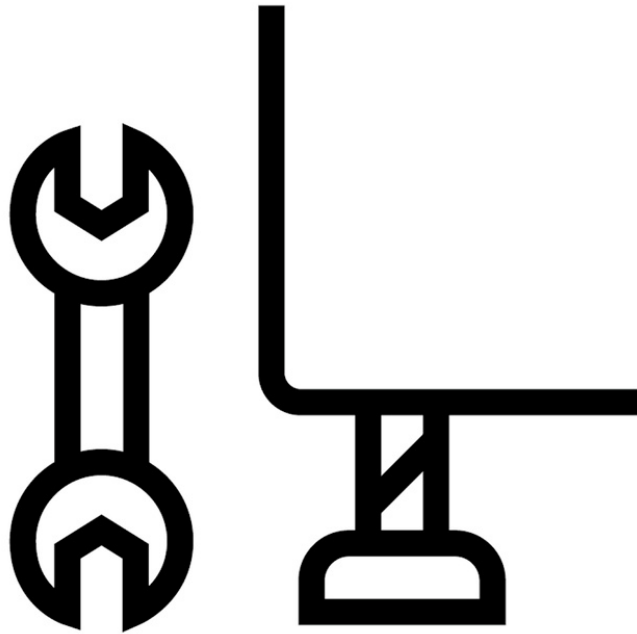

The sturdy, secure handles have an elegant, premium quality appearance and feature an integrated opening mechanism, which allows convenient and effortless door opening.

Durable worktop

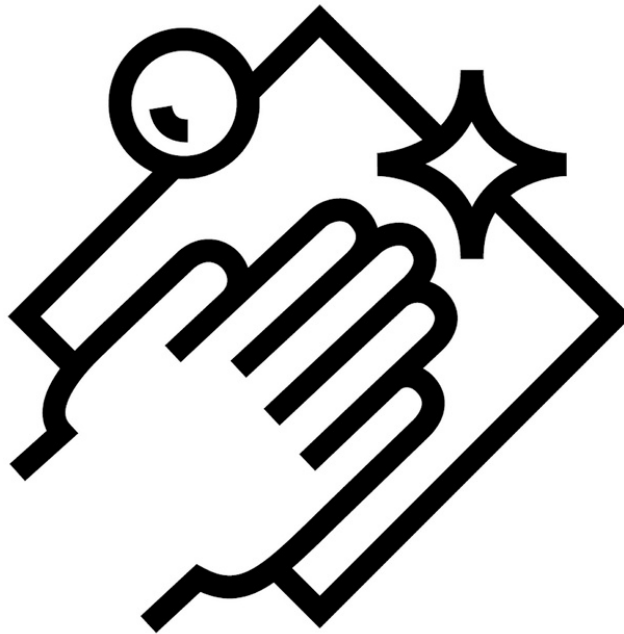

You can never have enough worktop space when cooking. That's why our Undercounter appliances come with a sturdy and durable surface that even withstands scratches and thereby serves as an extension of your working top.

Additional features

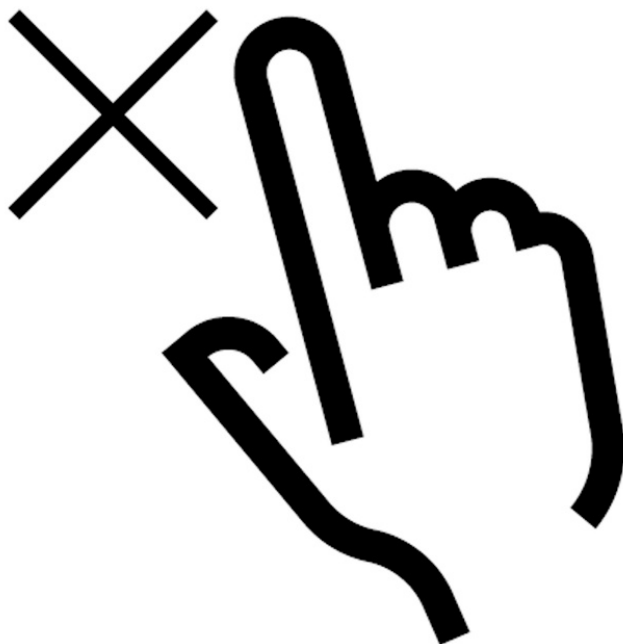

Adjustable feet

Two adjustable feet mean the appliance can be perfectly fitted and adjusted to its surroundings, e.g. on uneven ground. This means you can be sure that the fridge door closes completely, no heat can enter and no condensation can form. That saves both energy and money.

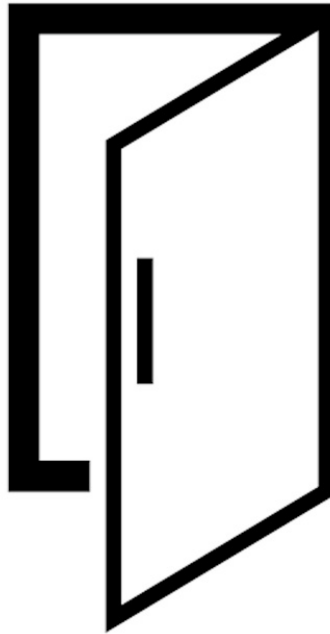

Dishwasher-safe features

The features of your Liebherr are practical in two ways: Not only do they simplify everyday use, they are also very easy to clean. Does the butter dish, FlexSystem or ice cube tray need to be cleaned? Just put them in the dishwasher. Then you'll have more time for other things.

Display lock

An illuminated display is a magnet for children's hands – your Liebherr also knows that. That's why there is the display lock. It ensures the settings on your refrigerator are not changed unintentionally. You can also, of course, simply deactivate the display lock.

Door alarm

Your Liebherr's door alarm ensures that you don't use up energy unnecessarily and spoil food. The moment the fridge door is left open for too long, it alerts you – with a pulsating light and a warning tone.

Door shelf

Do you want a safe storage area for your drinks or food? And do you still want to reach them easily? Our door shelves offer you both. They are height-adjustable and therefore meet all your requirements. The sliding and removable bottle holder is also convenient. This holds your bottles securely at all times.

Height-adjustable door shelves

Use all of the space in your Liebherr – and entirely to suit your requirements. The height adjustable inner door shelves will help with this: These allow you to change the height at which the shelves are mounted quickly and easily at any time – which means they can be used entirely flexibly and securely for storing a wide range of containers and food.

*

SmartDevice functionality based on availability

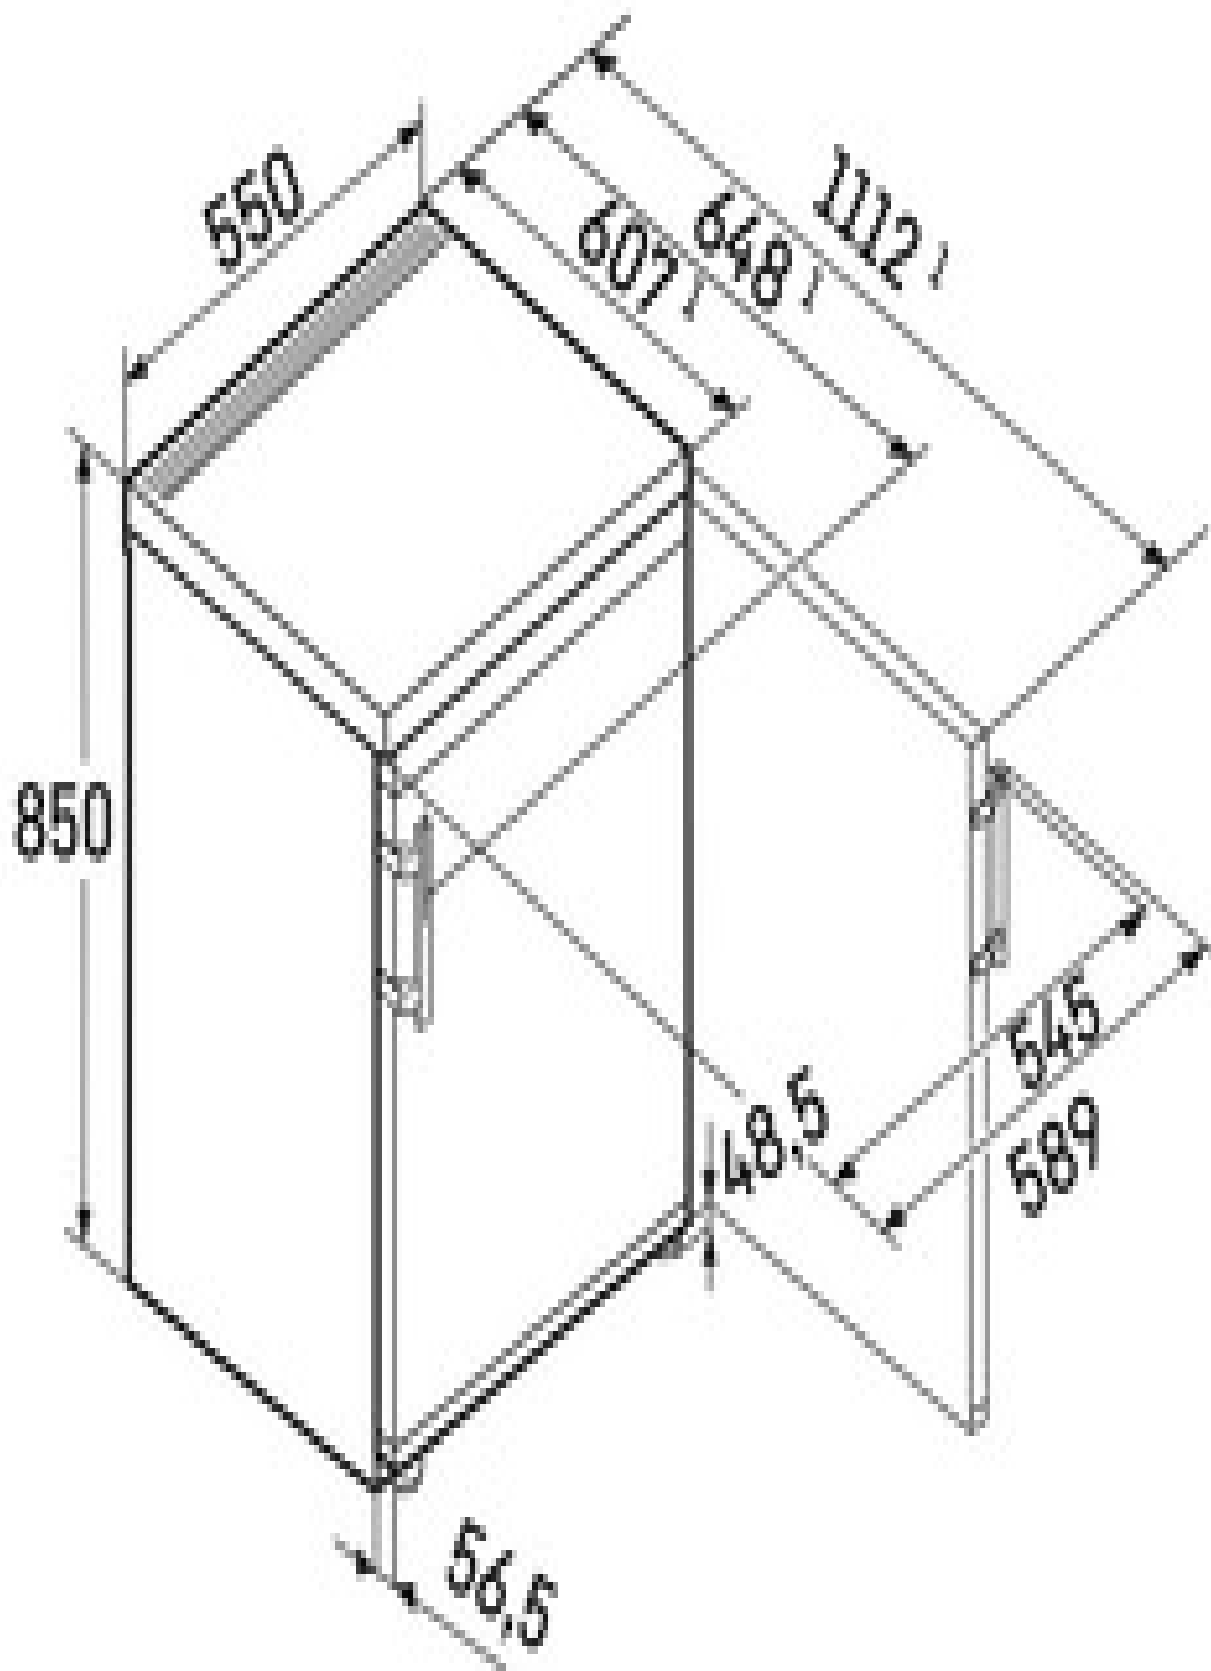

**

In accordance with Regulation EU 2019/2016, we show the total volume as an integer (rounded down) and the volume of the freezer and freshness compartments with one digit after the decimal point. The complete range of efficiency classes can be found on page 9. According to (EU) 2017/1369 6a. The term "volume" refers to the term "total volume" mentioned in the current regulation.
