

Stanley Pellet Stove Wi-Fi Kit

Adding to the comfort and style of our Stanley SOLIS pellet stove range, we have launched our new Pellet Stove Wi-Fi Kit that makes controlling your stove even easier. By using the handy app linked to the USB-like receiver at the back of the Stanley SOLIS pellet stove, you get remote function controls both inside and outside your home.

WHAT ARE THE BENEFITS?

- The ability to control your pellet stove remotely. This allows you to turn on the heat when you know you will be heading home or should you have forgotten to turn the stove off before leaving the house.
- Full control of your pellet stove from your smartphone – simply install “**My Stove Remote**” which is the CEZA APP.
- Interacts seamlessly with the controller on your stove. Turn on or off without moving from your chair.
- Plug and Play - It’s as simple as plugging in the Wi-Fi USB into the port on the rear of your pellet stove and following the app instructions. You will need Wi-Fi at home to operate this system.
- Available on all room heating and central heating Stanley SOLIS Pellet Models

My Stove Remote

MY STOVE REMOTE APP

My Stove Remote is the CEZA APP that allows the whole family to be able to control your pellet stove directly from a Smartphone (also from tablet or PC) The APP, combined with the WI-FI Ceza module, takes over all the commands available on the display without any exception. The configuration of the **My Stove Remote** APP is very simple and intuitive.

Once connected the Wi-Fi module to the stove, just associate it to the home network to have the total control of your stove directly from the Smartphone or other mobile devices. An instruction manual is available to walk you through the steps when downloading the app.

5 STEPS TO EASY INSTALLATION

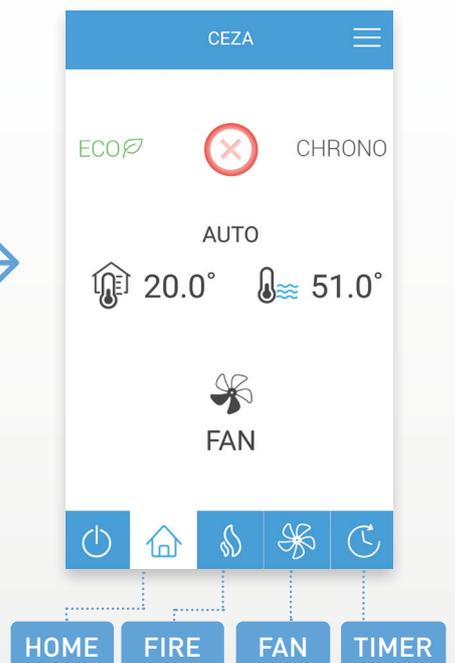

1. Plug the Wi-Fi module into the port on the rear of your pellet stove (see left)
2. Connect your phone to the home Wi-Fi Network that the Wi-Fi module will connect to
3. Download the **My Stove Remote** app to your smartphone
4. Take the "SIGN UP" option
5. Complete the screens as shown below:

Complete the Sign in screen

Set a name for your stove

The easy-to-use app lets you adjust the heat levels and use a timer for maximum flexibility and control.
